Title: Streets Run Road Flood Control

Improvement Type: Restoration

State Route: 2046

Municipality: West Mifflin (BORO)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 4/15/2028

Location: Located on SR 2046 (Streets Run Road) from Prospect Road to Baldwin Road in Baldwin and West Mifflin Boroughs, Allegheny County.

Project Description: Study to assess resilience improvements on SR 2046 (Streets Run Road) from Prospect Road to Baldwin Road in Baldwin and West Mifflin Boroughs, Allegheny County. This road continuously floods, causing the need for immediate action from the Maintenance Division. A comprehensive study is needed to determine where flood control measures can be constructed to mitigate this concern.

**PennDOT Project Id:** 100382

**Project Administrator:** SPC

**Title:** SPC - Traffic Signal 4

**Improvement Type:** Existing Signal Improvement

**State Route:** 50

**Municipality:** Collier (TWP)

**Air Quality Status:** Significant: Included in regional conformity analysis

**Actual Construction Bid Date:** 1/12/2023

**Estimated Construction Bid Date:** 1/12/2023

**Location:** Located on State Route 50 in Scott/Collier/Heidelberg, SR 286 in Plum; Lincoln Avenue n Bellevue in Allegheny County, State Route 2001 in Baden, Beaver County; State Route 65 in New Castle/Shenango, Lawrence County.

**Project Description:** (Sponsor = SPC) SPC's Regional Traffic Signal Program proposes to continue its mission of improving the operation and safety of the region's key arterial corridors by funding and implementing signal improvement projects that result in optimized and coordinated signal operations. Working with municipalities and PennDOT, this has been achieved with two types of projects:

-SINC-UP projects: These projects include minor equipment upgrades in addition to signal retiming. The equipment upgrades are focused on areas required for signal coordination, energy savings, and safety (communications, controllers, and indications). These projects may also include removal of traffic signals that are no longer warranted.

-SINC projects: These projects include signal retiming only for corridors and intersections that are already adequately equipped for coordination purposes.

**Title:** TMA TDM Programming & Outreach

**Improvement Type:** Traffic System Management

**State Route:** 0

**Municipality:**

**Air Quality Status:** Exempt from Regional Conformity Analysis

**Actual Construction Bid Date:**

**Estimated Construction Bid Date:**

**Location:** Multiple Municipalities throughout Allegheny County

**Project Description:** This project is for the programming and outreach activities of Allegheny County's 3 Transportation Management Associations:

Airport Corridor Transportation Association (ACTA) provides marketing, education and outreach services to improve air quality and mitigate congestion in the ACTA service area, including the RideACTA Shuttle Transit Service and Montour Trail Council efforts for commuting alternatives. ACTA will also work with PennDOT District 11-0 to provide example TDM solutions for consideration during the PennDOT Connects process that will serve to reduce emissions and improve air quality.

The Oakland Transportation Management Association (OTMA) disseminates information, provides commuter resources tools, and traveler information services to employers, employees, students, residents, visitors, businesses and property owners. TDM efforts include continuous outreach and the providing of information to support better decision-making for travelers choosing modal options, trip times, and locations. Activities are aimed at reducing single-occupancy travel. OTMA Partners with Sustainability Teams from University of Pittsburgh Medical Center (UPMC) and the Allegheny County Health Department, distributes information on WalkPittsburgh and POGO bike-sharing) and promotes ride-matching assistance by CommuteInfo on the OaklandSmartCommute.org website.

Pittsburgh Downtown Partnership (PDP) coordinates education and outreach activities, access to work initiatives, and Transportation Demand Management promotion for the Pittsburgh Golden Triangle region. TMA staff provides TDM related content for two newsletters for Downtown stakeholders that cover traffic congestion issues and highlight newly implemented multimodal projects in the Downtown area. TMA staff coordinates a bi-monthly Construction Coordination Task Force (CCTF) with public agency, utility, and private developer representatives to ensure TDM related information is included in their communications on current or future construction projects.

Location: McCandless

Project Description: The proposed project is intended to remove and replace the existing traffic signal control components at the intersection of Ingomar Road and Blazier Drive within the Town of McCandless. The existing equipment at this intersection is outdated and aging with damaged vehicular signal heads serving as pedestrian indications for crossing Ingomar Road.

Title: Vehicular Detection and Accessible Pedestrian Sign

Improvement Type: Existing Signal Improvement

State Route: 0

Municipality: Mt Lebanon (TWP)

Air Quality Status: AQ Conformity Does Not Apply

Actual Construction Bid Date:

Estimated Construction Bid Date:

Location: Mt. Lebanon

**Project Description:** This project includes various signal upgrades at nine intersections along Washington Road in Mt. Lebanon. Seven of these intersections are located within the uptown business district. These intersections will all undergo upgrades to both radar vehicular detection and Accessible Pedestrian Signal (APS) devices. The scope of work would include removing of existing video and loop detectors and replacing them with radar detection systems (stop bar detection and advanced detection). In terms of the ADA-compliant accommodations, existing mechanical push buttons (which do not have any visual or audible notifications for pedestrians to know if the actuation has been received by the controller) will be removed and replaced with APS push buttons. Some existing push buttons may not be in reach or meet current standards, so some locations may require the installation of stub poles to support new push buttons. In addition to these seven intersection upgrades, the advanced vehicle detection at one additional intersection, and APS upgrades at another intersection, are proposed. Please see the Project Location Map for the intersection breakdown.

**Title:** Neville Road/Gulf Oil Access - Traffic Signal Impr

**Improvement Type:** Existing Signal Improvement

**State Route:** 0

**Municipality:** Neville (TWP)

**Air Quality Status:** AQ Conformity Does Not Apply

**Actual Construction Bid Date:**

**Estimated Construction Bid Date:**

**Location:** Neville Twp

**Project Description:** Neville Road is a four-lane, county owned roadway, which intersects with the Gulf Oil Company Access Road, a two-lane roadway, approximately 3,700 feet west of the Fleming Park Bridge on Neville Island in Neville Township. Neville Road runs east and west through the Township and provides vehicular access for residents living in the Township as well as heavy vehicle access for the various industries located in the Township. Neville Road is also a part of the Ohio River Bike Trail so the intersection needs to accommodate bikers as well as vehicles and pedestrians. The signal operates in isolation as a two-phase semi-actuated traffic signal. This project is intended to be a complete upgrade for the signal system at this intersection. The proposed project would maintain the existing geometry of the roadway but provide the following upgrades: new poles with mast arms, new controller assembly, new LED signal heads with back plates, a five-deck signal head for a potential eastbound advanced left turn, pedestrian countdown signal heads, ADA accessible ramps and detectable warning surfaces, new signage, and new radar vehicle detectors. The TSAMS Signal ID Number is TS-11459 and the Traffic Signal Permit Number is 1-076-06.

**Improvement Type:** Existing Signal Improvement

**State Route:** Upgrade  
0

**Municipality:** South Fayette (TWP)

**Air Quality Status:** AQ Conformity Does Not Apply

**Actual Construction Bid Date:**

**Estimated Construction Bid Date:**

**Location:** South Fayette Twp

**Project Description:** The traffic signal supports, controller detection, and associated equipment were all installed in 1998. The equipment has not been upgraded since it was initially installed. This project proposes to remove and replace the signal equipment at the intersection of Washington Pike and Twin Ponds Lane in South Fayette Township. This will include the installation of an entirely new traffic signal, including but not limited to the following: new mast arms, pedestrian pole(s), APS push buttons, radar detection, LED signals, pedestrian signals with countdown timers, signage, and ADA-compliant ramps and crossing.

**Title:** Steubenville Pike and Mahoney Drive - Intersection

**Improvement Type:** Existing Signal Improvement

**State Route:** 0

**Municipality:** North Fayette (TWP)

**Air Quality Status:** AQ Conformity Does Not Apply

**Actual Construction Bid Date:**

**Estimated Construction Bid Date:**

**Location:** North Fayette Twp

**Project Description:** Steubenville Pike (S.R. 3066) is a two-lane state owned roadway which intersects with Oakdale Road (S.R. 3063) and Mahoney Road. The intersection is located approximately 1,000 feet north of the Oakdale Interchange on US 22/30. Steubenville Pike parallels US Route 22/30 to the north providing access to residential and commercial land uses. The signal operates in isolation as a two-phase fully actuated traffic signal with emergency preemption. This project is intended to accommodate Minor Alterations to the traffic signal. We anticipate the installation of a new controller and cabinet, new signal heads and back plates, new pedestrian signals with countdown timers, replacement of vehicle loop detectors with radar detectors, along with the replacement of the pre-emption system. The existing traffic signal poles and mast arms appear to be in good shape and we intend to reuse them. The TSAMS Signal ID Number is TS-2192, the Traffic Signal Permit Number is 1-078-10 and the intersection is located along S.R. 3066 at Segment 0030 Offset 1355 and along S.R. 3063 at Segment 0030, Offset 1900.

PennDOT Project Id: 120250

**Project Administrator:** PennDOT

**Title:** Pittsburgh Controller Upgrades

**Improvement Type:** Existing Signal Improvement

**State Route:** 0

**Municipality:** Pittsburgh (CITY)

**Air Quality Status:** AQ Conformity Does Not Apply

**Actual Construction Bid Date:**

**Estimated Construction Bid Date:**

**Location:** Pittsburgh

**Project Description:** The City of Pittsburgh currently owns and operates a traffic signal communication network which connects approximately 125 traffic signals to a server rack located on the third floor of the City-County Building. These 125 traffic signals utilize Type 170 controllers with WAPITI W4IKS software and represent 20% of our inventory. The ATCMTD  SmartPGH  project will aggressively expand this network and install new Intelight MaxTime 2070 controllers at 135 signalized intersections. These 135 signalized intersections will participate in the PennDOT Traffic Signal Unified Command and Control Integration program and the City will migrate to the unified ATMS platform  QFree Kinetic Signals. This integration will allow for better collaboration between the City of Pittsburgh, PennDOT District 11-0 and PennDOT Bureau of Maintenance and Operations (BOMO).

Of the 125 signals currently on our communication network, 42 of these intersections have plans for controller upgrades through existing projects (CBD PhaseIV, PRT Bus Rapid Transit, ATCMTD  SmartPGH ). This leaves 83 traffic signals that will run Type 170 Controllers with WAPITI W4IKS software that have no imminent plans for upgrades. A list of these signalized intersections is attached to this application.

As of 2022, QFree does not have an anticipated date for WAPITI integration into their Kinetic Signals platform. This would restrict 83 traffic signals from participating in the Unified Command and Control Integration as well as prohibit them from integrating into a new city ATMS platform. The combination SmartPGH/Bus Rapid Transit projects are a generational investment in traffic signal technology and leaving over 10% of our inventory off our ATMS platform would be the equivalent to taking  two steps forward and one step back .

The most reliable and likely quickest path to ATMS integration would be to replace 83 existing 170 controllers with 2070 controllers running Intelight MaxTime. Type 170 controllers and the WAPITI software package are obsolete and no longer supported. The City of Pittsburgh will be required to phase out this antiquated infrastructure regardless of our ATMS platform integration, so this is a sensible time to make a large-scale investment in 2070 controllers. Our electricians have worked with this product for three years with minimal concerns. With this upgrade, 35% of our traffic signal inventory would have network coverage.

The new controllers will come equipped with proposed traffic signal timings and tested conflict monitors. The removal/installation of these controllers will be completed by City of Pittsburgh personnel to eliminate construction costs. Ongoing maintenance of controllers will be provided by City of Pittsburgh electricians, who currently maintain approximately 40 signalized intersections using the same controller software.

**Title:** City of Pittsburgh Traffic Signal Replacements

**Improvement Type:** Existing Signal Improvement

**State Route:** 0

**Municipality:**

**Air Quality Status:** AQ Conformity Does Not Apply

**Actual Construction Bid Date:**

**Estimated Construction Bid Date:**

**Location:** Pittsburgh

**Project Description:** Penn/Highland - This project consists of the complete replacement of the traffic signal located at the intersection of Penn Avenue at Highland Avenue which are classified as major Arterial roads by PennDOT's classification. The intersection is a heavily trafficked node in the non-residential heart of East Liberty with multiple shopping and restaurant alternatives as well as other destinations such as a library, a church, a theater and office spaces.. Highland Avenue takes drivers from Squirrel Hill straight through to the northern most part of the Highland Park neighborhood. Penn Avenue acts as a similarly long connector, running west from Point Breeze North through multiple neighborhoods into downtown Pittsburgh. There are bus stops at three corners of this intersection, facilitating a total of 8 different bus lines.

Aiken/Ellsworth - This project consists of the complete replacement of the traffic signal located at the intersection of South Aiken Avenue and Ellsworth Avenue in the City of Pittsburgh's Shadyside neighborhood. By PennDOT's roadway functional classification, Aiken Avenue is classified as a Minor Arterial road while Ellsworth Avenue is a collector, making both important and in-demand corridor even though they run through a mostly residential area. No major developments are located at the corners, however, northwest of the intersection is UPMC Shadyside, a major hospital for the city and Walnut Street, a small business district comprised of many small shops and restaurants, is southwest of the intersection. The 75 bus route has, on average, 55 daily users at this intersection. (Pre pandemic average 113).

Bayard/Neville This project consists of the complete replacement of the traffic signal located at the intersection of Bayard Street and Neville Street in both the City of Pittsburgh's Shadyside and North Oakland neighborhoods with Neville Street serving as border. By PennDOT's own functional roadway classification, Neville Street is considered an Urban Collector corridor while Bayard Street is a local road. While single family homes make up part of the corner, multiple apartment buildings corroborate high pedestrian traffic around the area. Also within walking distance of this intersection are multiple churches, a high school and a number of restaurants and office spaces. The P3 bus sees an average of 34 riders at this intersection daily.

All Intersections: Due to the age and unknown structural quality of the outdated steel poles and controllers, significant traffic signal equipment upgrades are impractical without a complete replacement of poles and other infrastructure at all of the intersections.

Title: Pedestrian Crosswalks - Oxford Drive

Improvement Type: Existing Signal Improvement

State Route: 0

Municipality: Bethel Park (BORO)

Air Quality Status: AQ Conformity Does Not Apply

Actual Construction Bid Date:

Estimated Construction Bid Date:

Location: Bethel Park

**Project Description:** The primary goal of this project is to replace antiquated pedestrian signal equipment and provide safer transportation for pedestrians and motorists along Oxford Drive, Bethel Park, Allegheny County. Exact locations include Oxford Drive at Home Depot Driveway/UPMC South Driveway and Oxford Drive at Alicia Drive. The proposed work includes the installation of pedestrian countdown timers, new pedestrian push buttons with guidance signage, reflectorized backplates for better visibility, LED signal replacement, and all pertinent wiring. Implementation of these upgrades will ultimately reduce pedestrian and motorist confusion, encourage alternative modes of transportation, thus improving public health, and also boost revenue at nearby businesses.

This project was identified as a need by Bethel Park Traffic Police who receive complaints from pedestrians and motorists alike regarding the crosswalk and traffic confusion.

The Police utilize Visual Alert to track and record any issues with signals. Unless it is an emergency, most issues are directed to the traffic police who contact Traffic Control or Rhythm Engineering (contracted maintenance engineer). While Bethel Park works towards developing an Active Transportation Plan, implementing these improvements demonstrates the Municipality's commitment to pedestrian and motorist safety.

Title: Fox Chapel Road and Field Club Road Signal

Improvement Type: Existing Signal Improvement

State Route: 0<sup>Upgrade</sup>

Municipality: Fox Chapel (BORO)

Air Quality Status: AQ Conformity Does Not Apply

Actual Construction Bid Date:

Estimated Construction Bid Date:

Location: Fox Chapel

**Project Description:** Field Club Road intersects with Fox Chapel Road approximately 1.75 miles north of the Fox Chapel Road Exit off S.R. 0028 and approximately 2 miles north of Freeport Road (S.R. 1001). The intersection of Fox Chapel Road and Field Club Road is equipped with an isolated, semi-actuated traffic signal. The signal dates back to 1970, with much of the equipment reflecting that age. Additionally, there are no pedestrian accommodations at the traffic signal, no pedestrian signal heads, no pedestrian pushbuttons, and no ADA-accessible ramps or platforms. This project is intended to be a complete upgrade of the signal system at this intersection. We anticipate the installation of an updated controller, new mast arm, and LED signal heads, as well as needed pedestrian facilities, ADA-compliant crosswalks, and emergency pre-emption equipment. The TSAMS Signal ID Number is TS-11393. The Traffic Signal Permit Number is 1-044-01.

The intersection of Fox Chapel Road and Field Club Road serves as a primary crossroads in the community with several nearby daily traffic generators. Most of the Borough's municipal buildings are located just north of the intersection along the west side of Fox Chapel Road. This collection of buildings houses the Borough's administration office, police department, volunteer fire department, public works maintenance storage facilities, and the Cooper-Siegel Community Library. Across the road in the southeast corner of the intersection sits the Fox Chapel Presbyterian Church and daily preschool. Located within a mile of the intersection are Fox Chapel Area High School, O'Hara Elementary School, Shady Side Academy's Country Day School, Middle School, and Senior School, as well as numerous community destinations, including multiple parks and trail systems, the Pittsburgh Field Club, and the Fox Chapel Golf Club.

Title: Ingram Avenue Signal Replacement Project

Improvement Type: Existing Signal Improvement

State Route: 0

Municipality: Ingram (BORO)

Air Quality Status: AQ Conformity Does Not Apply

Actual Construction Bid Date:

Estimated Construction Bid Date:

Location: Ingram Boro

**Project Description:** The proposed project is advocating for the upgrade of outdated traffic signal components at the intersection of Ingram Avenue and Prospect Avenue in Ingram Borough to meet current standards. Ingram is looking to redefine this arterial roadway through other efforts as well. A preliminary design of a streetscape along Ingram Avenue is awaiting funding from the Multimodal Transportation Fund (MTF) Program. This signal replacement would help to improve the corridor for vehicles, bicycles, and pedestrians alike.

Title: Evergreen Road and North Avenue Signal Upgrade

Improvement Type: Existing Signal Improvement

State Route: 0

Municipality: Millvale (BORO)

Air Quality Status: AQ Conformity Does Not Apply

Actual Construction Bid Date:

Estimated Construction Bid Date:

Location: Millvale Boro

**Project Description:** The proposed project is intended to replace the outdated traffic signal equipment at the intersection of Evergreen Road and North Avenue located within the Borough of Millvale. The existing configuration consists of vehicular signal heads mounted on utility poles adjacent to the roadway, rather than over the roadway.

**Improvement Type:** Existing Signal Improvement

**Municipality:** Monroeville (BORO)

**Actual Construction Bid Date:**

**Location:** Monroeville

**Title:** Monroeville Boulevard, Municipal Driveway and

**State Route:** Nor  
0

**Air Quality Status:** AQ Conformity Does Not Apply

**Estimated Construction Bid Date:**

**Project Description:** This project will consist of replacing the existing traffic signal at the intersection of Monroeville Boulevard and Northern Pike (SR 2081)/ Municipal Center with a new traffic signal comprised of mast arms with overhead cabling.

When the Municipal Center was replaced in 1999 a portion of this signal was replaced but much of the original 1972-era signal was not, including two cor-ten strain poles that support 3 of the 4 span wires. Cor-ten poles have a documented history of unexpected failure and their replacement is a high priority for the Municipality. We previously attempted to hire a testing firm to evaluate the structural integrity of the poles and perform ongoing monitoring of their condition but were told that was not possible without original design calculations and pole data (which is not available) Regardless even the newer era components are approaching a quarter century old and the rest is over half a century old.

The poly-carbonate vehicular signal heads are generally faded and brittle and have corroded/ deteriorating terminals, still utilize incandescent bulbs, have no reflective back-plates, and generally provide relatively dim indications at a location that has a crash history.

The pedestrian signal heads are brittle outdated top & bottom heads with corroded terminals which provide dim indications and for which replacement parts (LED inserts) are becoming difficult to source.

The pedestrian push-buttons are older mechanical (micro-switch) non-ADA compliant push-buttons which are corroded and in need of replacement.

The in-pavement loop detectors and lead-in wires have been cut and re-spliced during a myriad of resurfacing projects creating unreliable detection and a maintenance burden.

Underground and within-pole signal cabling has been spliced together tying the old to the new which is failing and in many cases the splices are inaccessible.

Metal underground conduits are rusted away in some cases precluding pulling new cable for repairs or improvements.

Current overhead cabling has disintegrating insulation which is causing corrosion and could cause shorts, outages, or the signal to go into flash.

Signage is becoming faded due to age and exposure to UV degradation.

The preemption system which is heavily used and absolutely necessary for police vehicles exiting the police station en-route to emergencies is obsolete and needs replaced.

This signal at the entrance to our Municipal Complex (including our police station, emergency/ disaster command center, and regional 911 dispatch center) is not only critical to emergency management and public safety it is aesthetically important as the entrance to our version of the "Town Hall"

**Title:** SR 2082 (Hulton Road and Coxcomb Hill Road)

**State Route:** AND SR  
0

**Air Quality Status:** AQ Conformity Does Not Apply

**Estimated Construction Bid Date:**

**Project Description:** The SR 2082 (Hulton Road and Coxcomb Hill Road) and SR 2058 (Hulton Road) Pedestrian Improvements includes removal of the existing pedestrian island and associated signal revisions to accommodate the removal. These would include new pedestrian pedestal pole, stub poles, push buttons, conduit, wiring, controller modifications, pedestrian curb ramps on the southwest and southeast corners, signing and pavement markings. The improvement would include conversion of the existing un-signalized, yield controlled eastbound right turn movement to a controlled movement including a right turn overlap phase that will require an additional 5-section vehicular signal on the approach. The project will include removal of the island and repaving to be completed by the Borough outside of the Green-Light Go Application.

Additionally, this intersection is adjacent to Oakmont Country Club, which is hosting the U.S. Open in 2025. It is the Borough's goal to have this work completed in 2024 well ahead of the June 2025 event date.

**Title:** SR 66/SR128 Riverside Light Upgrade

**Improvement Type:** Existing Signal Improvement

**State Route:** 0

**Municipality:** Manor (TWP)

**Air Quality Status:** AQ Conformity Does Not Apply

**Actual Construction Bid Date:**

**Estimated Construction Bid Date:** 5/22/2025

**Location:** Armstrong County

**Project Description:** The project would include the complete replacement of the traffic signal at the intersection of SR 66, SR 128, & Fort Run Road, the controller cabinet, equipment, signal heads, pedestrian facilities, and detection. Much of the equipment is reaching the end of life cycle and is causing frequent repairs to keep it operational.

The scope would be full replacement to a newer style light per PennDOT Guidelines.

The project is needed due to the safety risk that is caused by malfunctioning equipment that needs continuous repairs. Two of the approaches to the intersection have a -4% and -5% grade. The loop detection was replaced in 2016 with SmartMicro Radar which isn't reliable and has to have continuous maintenance just to remain operational. The controller is an Econolite ASC2 and needs updated since parts are difficult to find and support no longer is offered. The wiring in the back panel is aging and becoming a maintenance concern as well. The signal poles need replaced since there are no records as to the poundage of the existing poles. This prohibits the ability to help improve the functionality of the signal such as the installation of 4-section flashing yellow arrows.

**State Route:** 1038

**Municipality:** Kittanning (BORO)

**Air Quality Status:** AQ Conformity Does Not Apply

**Actual Construction Bid Date:**

**Estimated Construction Bid Date:** 5/7/2026

**Location:** Along side streets connecting to Market Street in Kittanning Borough, Armstrong County

**Project Description:** This streetscape improvements project is to extend the beautification and other improvements completed on Market Street in 2018 to the connecting side streets that intersect this main commercial district. This will help to extend the accessibility and uniformity of the primary commercial district area. These improvements will include new concrete curbs and sidewalks, new pedestrian lighting, new parking meters, benches, trash receptacles and improved ADA access in Kittanning Borough, Armstrong County.

Title: Freedom Rd Upgrade - Ph A

Improvement Type: Relocation/Realignment

State Route: 2004

Municipality: Freedom (BORO)

Air Quality Status: Significant: Included in regional conformity analysis

Actual Construction Bid Date: 9/15/2016

Estimated Construction Bid Date: 9/15/2016

Location: Located on SR 2004 (Freedom Road) from SR 65 to Park Quarry Road in New Sewickley Township, Beaver County.

**Project Description:** Reconstruction and realignment of portions of S.R. 2004 (Freedom-Crider Road) and Crows Run Road in the Borough of Conway and New Sewickley Township, Beaver County. The project starts near the existing intersection of T-575 (Crows Run Road) and S.R. 0065 (Ohio River Boulevard) in the Borough of Conway and proceeds to approximately 1000 feet east of the existing S.R. 2004 intersection with T-606 (Park Quarry Road) in New Sewickley Township. The project will consist of reconstructing T-575 (Crows Run Road) and relocating S.R. 2004 to follow the T-575 corridor. The new roadway will be widened to include two-11' lanes with 6' shoulders. Turn lanes will be added on S.R. 0065 at the newly signalized intersection with reconstructed Crows Run Road (to be changed to S.R. 2004). A left turn lane will be added to reconstructed Crows Run Road onto S.R. 0065. A center turn lane will be added on S.R. 2004 near the intersection of Park Quarry Road and the newly named S.R. 2018. The total project is 8,910 feet in length (1.69 miles) and includes:

- 1.) Construction of new and replacement structures over Crows Run and its tributaries.
- 2.) Realignment of approximately 400 feet of Romigh Road and reconstruction of the intersection of Romigh Road and the proposed S.R. 2004.
- 3.) Realignment of approximately 800 feet of Park Quarry Road (T-606) and its intersection with S.R. 2004.
- 4.) Reconstruction of S.R. 0065 in the vicinity of the new S.R. 2004 signalized intersection.
- 5.) Relocation of four portions of existing Crows Run stream.
- 6.) Replacement of guide rail, drainage, signing, pavement marking, etc., related to the above items.

**Title:** Cranberry Township Five Signal Detection Upgrade

**Improvement Type:** Existing Signal Improvement

**State Route:** 0

**Municipality:** Cranberry (TWP)

**Air Quality Status:** AQ Conformity Does Not Apply

**Actual Construction Bid Date:**

**Estimated Construction Bid Date:**

**Location:** Cranberry Twp

**Project Description:** Cranberry Township has identified the following intersections in need of traffic signal detection upgrade in the next three years. Located along critical corridors where detection is necessary for efficient signal operation, the upgraded signals will improve traffic flow times and require less manpower to manage. The current detection at these intersections is reaching end of life at 10-15 years old. Detection equipment will be replaced with upgraded radar and video detection as indicated. These five (5) intersections include (from west to east):

Freedom Rd/Connector St/Cranberry Mall - This intersection is currently equipped with Smartmicro (SMS) stop bar radar detection and is experiencing times of failure in detection and skipped phases. This system is not able to be supported or upgraded. This 4-way intersection is scheduled to be replaced with video detection at an estimated cost of \$32,000.

Route 19/Route 228/Freedom Rd - This intersection is also currently equipped with Smartmicro (SMS) stop bar radar detection. This intersection is the busiest in the region with over 80,000 vehicles per day. Reliability issues have arisen with this detection at this critical crossroads in the region. This large scale intersection is scheduled to be replaced with radar detection with an estimated cost of \$65,000.

Route 228/I-79 SB Off Ramp and Route 228/I-79 NP Off Ramp- These intersections are currently equipped with Wavetronics Matrix radar detection. This detection is old and outdated. This 3-way mast arm intersections at the limited access interchange are recommended to be best serviced by replacing with video detection with an estimated cost of \$30,000 each.

Route 228/Cranberry Woods Dr/Cranberry Springs Drive - This intersection is currently equipped with Wavertronics Matrix radar detection. This detection is having reliability issues. This is the second busiest intersection in the Township handling both commercial and industrial traffic. This 4-way intersection is recommended to be replaced by video detection, specifically Econolite EVO for a more robust detection oversight, with an estimated cost of \$50,000.

**Title:** McClure/Kingview Road Interchange

**Improvement Type:** Safety Improvement

**State Route:** 119

**Municipality:** Upper Tyrone (TWP)

**Air Quality Status:** Significant: Included in regional conformity analysis

**Actual Construction Bid Date:**

**Estimated Construction Bid Date:** 4/10/2025

**Location:** New Interchange to be constructed over US 119 between US 119/T-821 (McClure Rd.) and US 119/Kingview Road  
Bullskin and Upper Tyrone Townships, Fayette County  
Segments 0750/0304 to 0780/2481

**Project Description:** This project is for intersection improvements on US 119 at McClure Road and Kingview Road in Upper Tyrone and Bullskin Townships, Fayette County. The project will eliminate two signalized intersections on US Route 119 with Kingview Road and McClure Road, and a new full-access interchange would be constructed in between the two existing intersections. A new bridge carrying a new connector road would be constructed.

**Improvement Type:** Existing Signal Improvement

**State Route:** 0

**Municipality:** Dunbar (TWP)

**Air Quality Status:** AQ Conformity Does Not Apply

**Actual Construction Bid Date:**

**Estimated Construction Bid Date:**

**Location:** Dunbar Twp

**Project Description:** This project will upgrade the older style loop detectors with radar detectors at the intersection of US 119 and Pechin Road. In addition to the new radar detectors, GPS clocks will be installed at the this intersection and the 2 intersections to the north (Woodvale Street and Walmart Drive). The goal of the GPS clocks is to attempt to have traffic along US 119 travel more in platoons rather than random traffic arrivals. This should improve the safety of motorists turning out of the many driveways and intersections along this stretch of US 119. The timings of the 3 traffic signals will also be optimized. Emergency vehicle preemption and a battery back up will be installed at the US 119/Pechin Road intersection.

**Estimated Construction Bid Date:** 12/12/2024

**Location:** SR 2003/ SR 2028  
Franklin Township  
Greene County

**Project Description:** This project involves the reconstruction of the SR 2003 (Sugar Run Road)/ SR 2028 (South Porter Street) intersection located in Franklin Township, Greene County. The project is currently in the very early stages of Preliminary Engineering. The design consultant is gathering survey, right of way, and utility data. Once all of this information is obtained, the design consultant will develop a Preliminary Alternative Analysis Report investigating three (3) alternatives for review. The alternates under consideration at this time are a roundabout, relocation of the intersection(s), and improvements to the existing intersections.

**PennDOT Project Id:** 105124

**Project Administrator:** PennDOT

**Title:** US 22 Ped/Bike Bridge MTF

**Improvement Type:** New Bridge

**State Route:** 22

**Municipality:** Burrell (TWP)

**Air Quality Status:** AQ Conformity Does Not Apply

**Actual Construction Bid Date:**

**Estimated Construction Bid Date:** 8/22/2024

**Location:** Along US 22 in Burrell Township just west of the 119 interchange.

**Project Description:** This bicycle and pedestrian facilities project includes the construction of a county-owned multi-purpose pedestrian bridge over US 22 immediately west of the US 119 interchange. The primary purpose is to connect the Hoodlebug and Blairsville Riverfront trails. This will expand the multi-state trail network and connect with the local park-and-ride lot, providing a safe and authorized route for bicyclists, pedestrians, students needing access to the local school, and for anyone else wanting a non-vehicular crossing across US 22. The project is located in Burrell Township, Indiana County.

**Title:** PA 18 Signal Upgrades

**Improvement Type:** Existing Signal Improvement

**State Route:** 18

**Municipality:** Washington (CITY)

**Air Quality Status:** Significant: Included in regional conformity analysis

**Actual Construction Bid Date:** 2/27/2020

**Estimated Construction Bid Date:** 2/27/2020

**Location:** PA 18- City of Washington

**Project Description:** This project includes the replacement of the following three existing traffic signals located in the City of Washington: PA 18 (Jefferson Avenue) at SR 4022 (Wylie Avenue), PA 18 (Jefferson Avenue) at PA 844, and SR 4022 (Wylie Avenue) at Allison Road. The project also includes two signals located at PA 18 (Jefferson Avenue) at SR 8014 (I-70 Ramps) and SR 4022 (Wylie Avenue) at SR 8014 (I-70 Ramps).

The installation of the new signals will include physical improvements such as: queue preemption for I-70 ramp approaches, detection on all approaches, LED signal heads, pedestrian accommodations, and spread spectrum radio system.

The project also includes various roadway improvements (such as ADA ramps and additional lanes as necessary).

Actual Construction Bid Date: 1/11/2024

Estimated Construction Bid Date: 1/11/2024

Location: BMS# 64 1060 0010 0000

**Project Description:** The State Route 1060 (Bridge Street)/Salina Bridge over the Kiskiminetas River and Norfolk Southern Railroad connects Bell Township, Westmoreland County with Kiskiminetas Township, Armstrong County. The project proposes to replace the Salina Bridge on a new alignment located immediately downstream from the existing bridge. The proposed bridge is anticipated to be a 3-span continuous composite steel plate girder bridge. The project will also address the existing deteriorated retaining wall parallel with SR 1060 approaching the bridge from the south. The approach roadway will be widened to provide 11' travel lanes and 5' shoulders. The intersections at each end of the bridge will be modified to improve maneuverability. Drainage will be upgraded as well as the guiderail, signs, and pavement markings.

\*No new capacity will be added\*

**Title:** LVTIP: PA 819 to Norvelt (PA 981-Q20)

**Improvement Type:** Corridor Safety Improvement

**State Route:** 981

**Municipality:** Mount Pleasant (TWP)

**Air Quality Status:** Exempt from Regional Conformity Analysis

**Actual Construction Bid Date:** 7/29/2021

**Estimated Construction Bid Date:** 7/29/2021

**Location:** PA 819/PA 981 Intersection to Norvelt (981-Q20)  
Mount Pleasant and Unity Townships, Westmoreland County

**Project Description:** The LVTIP (Laurel Valley Transportation Improvement Project) project will upgrade the PA 981 corridor from the intersection with PA 819 in Mount Pleasant Township to the intersection with US 30 in Unity Township, Westmoreland County.

The LVTIP will be constructed in three separate sections. The first (southern most) to be advanced will be the 981-Q20 which will extend from the intersection of SR 981 and PA 819 northward along 981 to Norvelt in Mount Pleasant Township.

Corridor improvements would include on-line upgrades as well as segments of new alignment where upgrades are not feasible due to physical/environmental constraints.

Title: LVTIP: Norvelt to Pleasant Unity

Improvement Type: Relocation/Realignment

State Route: 981

Municipality: Mount Pleasant (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 10/30/2025

Location: PA 981 from Norvelt to Pleasant Unity  
Mount Pleasant Township, Westmoreland County

Project Description: This project is for corridor improvements to PA 981 from the village of Norvelt to the village of Pleasant Unity in Mt Pleasant Township, Westmoreland County.

SR 981, Section V20 is approximately 3.5 miles and begins north of the SR 981 and SR 2021 (Kecksburg Road)/Mt. Pleasant Road intersection (Norvelt intersection) in Mount Pleasant Township. From just north of the Norvelt intersection, the project area extends generally along SR 2023 to the intersection with SR 130 in Unity Township. Section V20 primarily follows existing SR 2023 with some offline shifts to improve the roadway. No new capacity is planned.

Title: LVTIP: Pleasant Unity to Airport

Improvement Type: Relocation/Realignment

State Route: 981

Municipality: Unity (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 1/9/2025

Location: PA 981 from Pleasant Unity to Airport  
Mt Pleasant and Unity Townships, Westmoreland County.

Project Description: The LVTIP (Laurel Valley Transportation Improvement Project) project will upgrade 12 miles of the PA 981 corridor from the intersection with PA 819 in Mount Pleasant Township to the Westmoreland County Airport in Unity Township.

The LVTIP will be constructed in three separate sections. Section Y10 is the northern most and will tie into the recently completed 981-V10 project near the airport. SR 981-Y10 is approximately 2.5 miles in length and begins just south of the intersection of Bingham Road and the SR 2023 (Hill Churches Road) intersection in Mt. Pleasant Township. SR 981- Y10 then primarily follows existing SR 2023 northward to near the intersection with Green Street. At this point, the alignment proceeds in a northwestward direction to the Westmoreland Airport. It then extends through the Airport along the southern portion of Bay Hill Drive then intersects with existing SR 981 just south of the Arnold Palmer Airport. No new capacity is planned.

Corridor improvements would include on-line upgrades as well as segments of new alignment where upgrades are not feasible due to physical/environmental constraints.
